Australian Electorates ranked by total unemployment and under-employment

Total Roy Morgan Unemployment and Under-employment over the 12 months to July 2019 was 2.5 million (18.5%) which provides an insight into Australia's real level of unemployment and under-employment. The first task of any Government is to reduce unemployment to as low a level as possible.

In the recent Federal Election the high level of unemployment and under-employment played a key role in several key electorates which were won by the L-NP Government off the ALP opposition.

These electorates included Braddon (TAS) – 32.1%, Bass (TAS) – 29.1%, Herbert (QLD) – 27.4% and Longman (QLD) – 26.0%. All four electorates have much higher total unemployment and under-employment than the national average of 18.5%.

Looking forward there are several other Marginal electorates in which total unemployment and under-employment is high including Leichhardt (QLD) –33.1%, Hasluck (WA) – 21.4% and Swan (WA) – 20.2% for the L-NP. There are even more ALP marginal seats with high unemployment and under-employment including Hotham (VIC) – 29.6%, Blair (QLD) – 25.6%, Paterson (NSW) – 24.5%, Richmond (NSW) – 22.2%, Solomon (NT) – 22.1%, Moreton (QLD) – 21.1%, Griffith (QLD) – 20.7%, Shortland (NSW) – 20.4% and Dobell (NSW) – 20.0%.

Leichhardt QLD	33.1%	New England NSW	22.4%	Calare NSW	19.8%	Kooyong VIC	17.2%	Reid NSW	13.9%
