Confidence steady as vaccination rates increase

- Consumer confidence changed little last week, up 0.2% despite higher COVID-19 case numbers in NSW and Victoria. The increasing vaccination rate may be raising hope that despite prolonged lockdowns, things will get better.
- The subindices registered mixed results: 'Current financial conditions' declined 3.2%, while 'Future financial conditions' gained 1.3%.
- 'Current economic conditions' improved 6.0% after falling significantly last week as those expecting 'bad times' for the economy over the next year declined. 'Future economic conditions' worsened 1.9%.
- 'Time to buy a major household item' barely moved, up just 0.2%. 'Weekly inflation expectations' and its four-week moving average hovered at 4.4%

ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last weekend (28-29 Aug)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
101.8	0.2%	100.8	112.5	4.4%

This weekly ANZ-Roy Morgan Australian Consumer Confidence Rating is based on 1,502 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

Consumer confidence rose 0.2% last week despite rising COVID case numbers. Sentiment in Sydney gained 0.9%, as daily case numbers rose above 1,000 for the first time. Confidence fell in Brisbane (-1.6%), Melbourne (-1.9%), Adelaide (-8.6%) and Perth (-0.8%). The overall steady outlook may reflect the increasing vaccination rates across the country and the hope that this will eventually bring lockdowns and border closures to an end.
