ANZ Head of Australian Economics, David Plank, commented:

Consumer confidence gained 3.1% last week, driven by a huge jump of 10.6% in Sydney as the NSW government released its roadmap out of lockdown. With close to 47% of NSW's adult population already fully vaccinated, this roadmap is expected to take effect by mid-October. That is, once the number reaches 70%. Confidence increased by 6.2% in Victoria, while it fell 3.2% in Queensland as new cases emerged in the state last week. Household inflation expectations have been quite volatile in the past few weeks, rising sharply then dropping back. Our [research](#) indicates that expectations tend to follow developments in petrol prices and the headline CPI. With these appearing to have peaked, we may be at a level where expectations stabilise.
